

Why would Neem work?

Various neem extracts are known to act on various insects in the following ways;

- **Disrupting or inhibiting the development of eggs, larvae, or pupae**
- **Blocking the molting of larvae or nymphs**
- **Disruption mating and sexual communication**
- **Repelling larvae and adults**
- **Deterring females from laying eggs**
- **Sterilizing adults**
- **Poisoning larvae and adults**
- **Deterring feeding**
- **Blocking the ability to “swallow” (that is, reducing the motility of the gut)**
- **Sending metamorphosis awry at various stages**
- **Inhibiting the formation of chitin**
